WHO AM I?

I am an Austrian Software Engineer, passionate about programming. I possess experience across a diverse range of technologies through professional endeavors, personal projects, and continuous education. My primary expertise lies in web applications and cross-platform mobile apps. I am Linux enthusiast and an advocate of Open Source technologies.

C # .NET Core
TypeScript
Golang

Ionic Postgres Angular Node.js .NET Docker K8S Azure IoT

EXPERIENCE

since 2022

Software Engineer

Freelancer

As Freelancer I work on exciting Projects in various different areas. I excel at crafting tailor-made solutions that precisely address the challenges at hand. My utmost focus lies in developing software of high quality, ensuring reliability and maintainability throughout its lifecycle to deliver a seamless and satisfying experience.

Web- and Mobile-Apps / Database Applications / Dashboards / Automations

2018 – 2022
part time

Software Engineer

Vendevio

In my job at Vendevio I mostly did Front- and Backend Development as well as some DevOps Tasks. I create web-apps and cross-platform mobile apps. I introduced Kubernetes at that company.

Node.js / .NET Core / Docker / TypeScript / Angular / Ionic / Azure IoT

2018
3 months

Internship as Web-Frontend Developer

Eurofunk Kappacher

In this internship I implemented features in the frontend of a large Angular application.

Angular / TypeScript

2017
2 months

Internship as Full Stack Developer

Dynatrace

During my time at Dynatrace I created an internal tool that gathers information about automated test coverage of different features on a number of platforms.

.NET Core / Angular / TypeScript

EDUCATION

2018 – 2021

Master's Degree in Software Engineering

Hagenberg Campus - FH Upper Austria

In this programme I got a deeper insight into software architecture, different fields of machine learning as well as evolutionary computation, cloud technologies, high-performance computing and compiler construction.

2019

Exchange Semester

Siberian State University for Aerospace Engineering

I spent a semester studying Systems Analysis in the city of Krasnoyarsk in the heart of Siberia.

2015 – 2018

Bachelor's Degree in Software Engineering

Hagenberg Campus - FH Upper Austria

This programme provided me with a thorough grounding in the theory and practice of sophisticated software development, including relevant tools, methodologies, and teamwork.

2010 – 2015

School for Higher Technical Education in Business Informatics

HTL Neufelden
